

Boil Water Advisory

Any time a water main loses pressure, whether due to a main break or a scheduled repair, the District issues a Boil Water Advisory. This is NOT a boil order, but a precautionary advisory we suggest our affected customers follow.

When under a Boil Water Advisory, customers are encouraged to take the following precautions:

1. Boil water vigorously for three minutes prior to use. Use only boiled water for drinking, brushing teeth, diluting fruit juices, and all other food preparations or consumption.
Water used for drinking or cooking should be boiled at a rolling boil for three (3) minutes prior to consumption.
2. Dispose of ice cubes and do not use ice from a household automatic ice maker. Remake ice cubes with water that has been boiled.
3. Disinfect dishes and other food contact surfaces by immersion for at least one minute in clean tap water that contains one teaspoon of unscented household bleach per gallon of water.
4. Water used for bathing does not generally need to be boiled. Supervision of children is necessary while bathing or using backyard pools so water is not ingested. Persons with cuts or severe rashes may wish to consult their physicians.

NOTE: Let water cool sufficiently before drinking.
