## **Qualifications Based Selection for Architectural, Engineering, or Land Surveying Services**

Water District staff will annually prepare and release a request for qualifications and performance data (collectively "Qualifications") to firms offering architectural, engineering, or land surveying services. This request will be placed on the Water District's website in November on an annual basis. A due date for Qualifications will be included in the request.

Annually submitted Qualifications will be considered by the Water District on a project-by-project basis throughout the year in a selection process that meets the State of Missouri's requirements.

In addition, project specific Qualifications may be requested from firms during the year for evaluation. The project specific Qualifications may be procured from firms that have not previously provided Qualifications. If project specific Qualifications are requested they will be evaluated together with those already on file.
